**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under pct Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required in reply to this action to elect a single invention to which must be restricted.

Group I, claim(s) 2-4, drawn to an electric shaver with the blade plurality of holes arranged in such a pattern as the major axis get longer gradually as said holes near a longitudinal end.

Group II, claim(s) 5-10, drawn to an electric shaver with outer blade arc having a transverse arc.

2. The inventions listed as Groups or Inventions I-II do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special features for the following reasons: The technical feature of the invention I, as mentioned above, is not present in inventions II. Conversely, the technical features in inventions II are not present in invention I. It should be noted that inventions I-II are distinct from one another by having at least a specific feature that is not presented in the other inventions.

3. Upon election of Group II above, applicant must elect of the inventions in the following subgroups:

Ila. claim(s) 7, drawn to an electric shaver with a transverse arc having a uniform radius curvature straddling an apex of the outer blade foil.

Ilb. claim(s) 8-9, drawn to an electric shaver with the blade head in a floating manner.

Ilc. claim(s) 10, drawn to an electric shaver with each of the outer blade foils being capable of being inclined against a spring load.

Claims 1, 5 and 6 will be examined with the election of any one subgroup from Ila – Iic.

4. Claim 1 links the inventions of subgroups Ila – Iic. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claim 1 & 5. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104.

5. The inventions listed as subgroups or Inventions Ila-Iic do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special features for the following reasons: The technical feature of the invention Ila, as mentioned above, is not present in inventions Ilb. Conversely, the technical feature in invention Ilb is not present in invention Ila. It should be noted that inventions Ila-Iic are distinct from one another by having at least a specific feature that is not presented in the other inventions.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bharat C. Patel whose telephone number is 571-27-03078. The examiner can normally be reached on Monday-Friday, alt. Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on 24502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
